

Trouble Affording Medications? Your Pharmacist Can Help

Your pharmacist helps keep you safe, so be sure to ask these questions to get the most from your medications:

1. What is the medicine for?
2. How do I take it? How long do I take it?
3. What are the possible side effects? What do I do if I experience them?
4. Is this medicine safe to combine with other medicines or dietary supplements I am taking?
5. What food, drink or activities should I stay away from while taking this medicine?
